Rated Power 10A, 1250W at 125V
USB-A Output 5V/2.4A
USB-C Output 5V/3A
Total USB Output 5V/3.4A Max

Product Diagram

1. Flat Plug - 45-degree angled design
2. Extension Cord - 5ft fabric braided cable
3. 2 USB-A and 1 USB-C - Intelligently detect and charge at ideal output
4. Phone Holder - Holds a phone while it's being charged
5. On/Off Switch - Controls the AC outlets and USB ports all together, and provides overload protection
6. 4 AC Outlets - Maximum 10A
7. PC Fireproof Shell - Made of PC UL94-V0, withstanding temperatures up to 1382°F / 750°C
8. 2 Keyhole Slots - Allow the power strip to be installed in various applications
9. Non-Slip Pads - Prevent the power strip from slipping or sliding

Warnings

- Water & Moisture - To reduce the risk of fire or electric shock, do not use in humid environment.
- Ventilation - This power strip should always be located in such a way that it maintains proper ventilation. Do not cover it with anything to prevent from overheating.
- Periods of Non-Use - Make sure to unplug the power strip when it is not expected to be used for a long period of time.
- High Power Devices - such as air conditioners, refrigerators, and hairdryers should not be plugged into this power strip. Those devices may exceed the rated power of 1625W.
- Voltage - This power strip supports 100-240V input, but does NOT convert voltage.
- Grounding - Only connected to a grounded outlet. For indoor use only.
- Modifications - Do not disassemble or modify it by yourself. Changes or modifications are not approved by the manufacturer and could void the product warranty.

FCC Compliance

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
