Instructions

For the operation video, please visit *https://www.youtube.com/@FosmonTech* and search "C-10798FAUS".

1. Program On and Off Schedule
• There are 48 push buttons around the dial. Each push button is for a period of 30 minutes.
• When a push button is pressed down, the appliance plugged into the timer will be on during that period of time.
• When a push button is lifted up, the appliance plugged into the timer will be off during that period of time.

NOTE:
1. If the push buttons are flush with the dial, they are in the up position. Otherwise, they are in the down position.
2. When the Current Time Pointer is pointing to a push button, the push button is not able to be pressed down. Turn the dial clockwise, and move the push button away from the pointer. Then you will be able to press the push button down.

2. Set Current Time
• Turn the dial clockwise one full revolution, and then advance it until the arrow points to the current time.
• The dark area denotes night time, and the white area denotes daytime.

3. Activate Timer
• After completing step 1 and 2, slide the switch to the 🕐 (TIMER ON) position to activate the timer.
• Plug the timer to a wall outlet, and then plug an appliance to the timer.
• Turn on the appliance to complete setup.

---

4. Deactivate Timer
• Slide the switch to the ⎓ (ALWAYS ON) position. The appliance connected to the timer will remain on.
